github.com/jouleka Tirana, Albania

Professional Summary

Full Stack JavaScript Developer with 6 years of experience building React.js, Next.js and Angular applications, Node.js services, and Ionic apps for iOS and Android. Technical ownership spans frontend architecture, legacy migrations, API integrations and mobile releases.

Work Experience

Moveo

Lead Frontend Developer

Jan 2024 - Present | Tirana, Albania (Remote)

- Led frontend architecture for a multi-tenant Angular monorepo, with shared application logic and configurable interfaces for brand-specific customization.
- Integrated REST APIs and introduced NgRx state management to keep frontend data and behavior consistent across tenants.
- Built an Ionic mobile app from scratch, delivering a shared codebase for iOS and Android.
- Owned platform-specific builds, release preparation, and App Store and Google Play submissions.
- Developed workforce-management features covering attendance, scheduling and employee self-service.

Web & mobile: Angular, TypeScript, RxJS, NgRx, Ionic, UIkit
Architecture & tools: Monorepos, multi-tenant applications, REST APIs, Webpack, Git

Helius

Full Stack Developer / Frontend Migration Lead

Sep 2021 - Mar 2024 | Remote

- Led frontend modernization of an e-learning platform, migrating legacy AngularJS functionality to Angular 15 and maintaining React.js features.
- Delivered product features across Angular and React.js interfaces and Node.js / HapiJS services.
- Developed product data-management features with PolymerJS, Java / Spring Boot and PostgreSQL.
- Improved responsive layouts and mobile usability across the frontend.
- Expanded release testing to catch regressions during frontend migration and feature development.

Web: Angular, AngularJS, React.js, PolymerJS, TypeScript, JavaScript
Backend: Node.js, HapiJS, Java, Spring Boot
Data: PostgreSQL, RethinkDB

Rayonit

Full Stack Developer

Jun 2021 - Aug 2021 | Tirana, Albania

- Built intelligent transportation software using Angular, TypeScript, Java / Spring Boot and MongoDB.
- Integrated connected sensors for real-time traffic data collection.

Stack: Angular, TypeScript, Java, Spring Boot, MongoDB

Technical Expertise

Frontend:
React.js, Next.js, Angular, AngularJS, TypeScript, JavaScript, RxJS, NgRx, HTML5, CSS / SCSS, Tailwind CSS, UIkit

Backend:
Node.js, HapiJS, Java / Spring Boot, REST APIs, GraphQL

Mobile:
Ionic, iOS / Android releases

Data & Delivery:
PostgreSQL, MongoDB, RethinkDB, Docker, CI/CD, Git, Webpack, monorepos, multi-tenant applications

Key Projects

MySigner
mysigner.dev

Founded and built a SaaS that automates iOS and Android app signing and deployment to TestFlight, the App Store and Google Play. Handles provisioning profiles, certificates and keystores through a single CLI command.

Tech: Ruby on Rails 8, Hotwire, PostgreSQL, Solid Queue, Tailwind CSS, App Store Connect API, Google Play Developer API, Docker, Kamal
