Professional Summary

Full Stack JavaScript Developer with 6 years of experience building React.js, Next.js and Angular applications, Node.js services, and Ionic apps for iOS and Android. Technical ownership spans frontend architecture, legacy migrations, browser call-state integrations and mobile releases.

Work Experience

Falcar (Communicator)

Lead Frontend & Mobile Developer (Contract)

Mar 2025 - Present | Remote

- Led development of Communicator's Ionic mobile app from scratch, delivering a shared codebase for iOS and Android.
- Owned mobile delivery across both platforms, including platform-specific builds, release preparation and App Store / Google Play submissions.
- Developed the Angular frontend for a cloud workforce-management platform covering attendance, scheduling and employee self-service.

myCicero

Frontend Developer / Frontend Architecture Lead

Jan 2024 - Oct 2026 | Tirana, Albania (Remote)

- Led frontend architecture for a multi-tenant Angular monorepo, with shared application logic and content-driven interfaces for brand-specific customization.
- Integrated REST APIs and introduced NgRx state management to keep data and frontend behavior consistent across tenants.

Callblitz

JavaScript Developer (Part-time)

Mar 2025 - May 2026 | Remote

- Resolved call connectivity and integration issues in the JavaScript browser extension used alongside Callblitz's video platform.
- Implemented DOM-based call-state detection in third-party tools such as HubSpot, passing call events to the backend to keep Callblitz's presence display aligned with active calls.
- Developed Angular frontend and Node.js backend features, and contributed to native macOS and Windows applications in Swift and C#.

Gutenberg Technology

Full Stack JavaScript Developer / Frontend Migration Lead

Mar 2022 - May 2025 | Boston, Massachusetts, United States (Remote)

- Led frontend modernization across AngularJS and React.js, migrating legacy e-learning functionality to Angular 15.
- Worked across React.js and Angular UI code and Node.js / HapiJS services to deliver and integrate product features.
- Expanded release testing to catch regressions during frontend migration and feature development.

Keendoo

Full Stack Developer

Sep 2021 - Mar 2022 | Nantes, France (Remote)

- Developed product data-management features with PolymerJS, Java / Spring Boot and PostgreSQL.
- Improved responsive layouts and mobile usability across the frontend.

Rayonit

Full Stack Developer

Jun 2021 - Sep 2021 | Tirana, Albania

- Built intelligent transportation software using Angular, TypeScript, Java / Spring Boot and MongoDB.
- Integrated connected sensors for real-time traffic data collection.

Technical Expertise

Frontend:
React.js, Next.js, Angular, AngularJS, TypeScript, JavaScript, RxJS, NgRx, HTML5, CSS / SCSS, Tailwind CSS, UIkit

Backend:
Node.js, HapiJS, Java / Spring Boot, REST APIs, GraphQL

Mobile & Desktop:
Ionic, iOS / Android releases, Swift, C#, browser extensions

Data & Delivery:
PostgreSQL, MongoDB, RethinkDB, Docker, CI/CD, Git, Webpack, monorepos, multi-tenant applications

Key Projects

MySigner
mysigner.dev

Founded and built a SaaS that automates iOS and Android app signing and deployment to TestFlight, the App Store and Google Play. Handles provisioning profiles, certificates and keystores through a single CLI command.

Tech: Ruby on Rails 8, Hotwire, PostgreSQL, Solid Queue, Tailwind CSS, App Store Connect API, Google Play Developer API, Docker, Kamal
